

We design & build exceptional software to empower businesses.

ABOUT US

At Solid Logix, we pride ourselves on delivering custom software enterprise solutions that streamline operations and enable scientific insights, driving unparalleled efficiency across federal and commercial projects. Our methodology is rooted in an agile, innovative approach, prioritizing rapid time-to-market and lean development to solve complex challenges in government and science.

CORPORATE DATA

CAGE/NCAGE: 8HFW9
Unique Entity ID: XJATJC99J287
DUNS: 081107353

NAICS Codes:

- 541511 : Custom Computer Programming Services
541512 : Computer Systems Design Services
518210 : Computing Infrastructure Providers, Data Processing, Web Hosting
611420 : Computer Training Services
541690 : Other Scientific and Technical Consulting Services
54151S : Information Technology Professional Services
611430 : Professional and Management Development Training

CORE CAPABILITIES

Custom Application & GIS Development

Tailoring software solutions for unique client needs, including geospatial analytics and data-driven applications to enhance decision-making and efficiency. For example, we developed a GIS-based platform for NOAA that allowed real-time data visualization for environmental monitoring, resulting in faster disaster response times.

Cloud Infrastructure Services

Leveraging scalable cloud technologies to ensure that our solutions are reliable, accessible, and secure, with a focus on supporting remote work and data availability. Our cloud transformation work for CMS reduced infrastructure costs by 30% while increasing data reliability by 25%.

DevSecOps & Agile Integration

Accelerating software delivery through automated CI/CD pipelines and equipping client teams with agile practices that foster rapid innovation and adaptability. We enabled automated integration pipelines for Sevita Health, reducing deployment times by 40%.

Scientific Software Solutions

Supporting research and operational projects for civilian and defense agencies, including environmental data processing and disease surveillance, ensuring rigorous scientific standards and operational resilience.

Cybersecurity Solutions

Providing robust security measures that safeguard sensitive government data, aligned with all necessary regulatory standards to ensure compliance. We have successfully implemented federal-grade security for CDC data management systems, ensuring compliance with CMMC requirements.

## DIFFERENTIATORS

**Unique GIS and Science Expertise:** Our work in building geospatial and scientific software sets us apart, with extensive experience supporting organizations like NOAA, CDC, and the Army in their environmental and scientific missions. Our GIS solutions have reduced data processing times by 20% for NOAA, providing a tangible benefit in decision-making capabilities.

**Perfect Partner for Subcontracting and Collaboration:** Solid Logix embodies the agility, reliability, and specialized knowledge that make us an ideal partner for large contractors and other service providers. Our history of successful partnerships demonstrates our ability to seamlessly integrate and support larger initiatives, enhancing overall project success with technical depth and strong team collaboration.

**Trusted by Industry Leaders:** Giants like Amazon, Twitch, and Moderna trust Solid Logix to deliver impactful technology solutions. For example, our product and technology solutions at scale enabled Twitch to enhance its real-time engagement capabilities by 25%. We bring this high-scale commercial expertise to our government projects, providing innovative, tested solutions.

**Driven by Agility and Innovation:** We are driven by a sense of urgency, experimentation, and client-centric collaboration, making us not only capable of solving today's challenges but also equipped to anticipate and adapt to the needs of tomorrow. Our lean product development approach has helped clients reduce time-to-market by up to 30%, saving costs while ensuring high quality.

**Led by Technologists with Greenfield & Modernization Experience:** Our leadership team consists of experienced technologists who have successfully executed both greenfield developments and modernization projects for federal and commercial entities, ensuring innovative and scalable outcomes. For instance, our team led the modernization of CDC's legacy systems, resulting in improved data reliability and efficiency.

## PAST PERFORMANCE

- ▶ Supported complex commercial product operations for **Amazon** and **Twitch**, providing product and technology solutions at scale, such as improving Twitch's real-time data engagement capabilities.
- ▶ Developed scientific applications for **NOAA** and **CDC**, supporting environmental monitoring and public health. Our solutions reduced NOAA's data processing times by 20%, enabling quicker response.
- ▶ Developed custom geo-enabled applications to support the work of engineers and architects in the field, for **USGS**, and **Army Corps of Engineers**.
- ▶ Enabled cloud transformation and custom software development for entities like **Moderna** and **CMS**, improving efficiency and expanding their operational capabilities while reducing costs

## OUR PARTNERS

We thrive on collaboration—working as a subcontractor or partner with other primes or technology companies, we integrate seamlessly to amplify the strength of every team we work with. Our partners value our flexibility, innovation-driven mindset, and specialized expertise.
